

The Chatterbox Game

Chatterboxes are made from folding a paper template to create a pyramid-like structure that has flaps that open to reveal certain messages or pictures.

Preparation:

Cut and fold the template provided here using the cut and fold guidelines and start playing the chatterbox game with your friends.

How to Play:

1. Choose a character - open and close the number of letters in the name eg:
Connie = 6

2. Open and close the number on flap you land on

3. Discover which character you are today. Do you agree? Does it change when you play again? That's great - we are all a mixture of all 5 characters!
